Visit	Date	Time window
Visit 1	21 Nov 2026	09:00 - 12:30
Visit 2	22 Nov 2026	09:00 - 12:30
Visit 3	24 Nov 2026	09:00 - 12:30

03 Assessment findings

Non-compliant: 1 | Partially compliant: 1

Criterion	Result	Evidence / observations
1. Patient identity is verified using two identifiers before clinical care. **JWD-01 | Weight: 2**	**Compliant**	A sample of 20 patient records was reviewed. All records contained the required identifiers. Staff demonstrated the identity verification process during observation. Evidence files: 1 attachment(s) in the audit workspace
2. Consent and clinical documentation are complete, legible and available. **JWD-02 | Weight: 2**	**Partial**	Three records were missing the time of consent. The nursing lead confirmed that the revised checklist has been introduced. A follow-up sample will be reviewed after staff briefing.
3. Staff follow the documented escalation procedure for abnormal results. **JWD-03 | Weight: 1**	**Non Compliant**	The escalation register did not consistently record the responsible clinician and time of acknowledgement. The department is updating the register and assigning daily checks.

04 Corrective action plan

Action / follow-up	Owner / due date	Status / priority
1. Introduce a daily documentation check and brief all clinical teams on the revised consent checklist. Criterion: JWD-02 Root cause: The current handover process does not include confirmation of consent documentation.	Dr. Amina Hassan Due: 1 Dec 2026	In Progress High priority

05 Review & approval

SUBMITTED BY	REVIEWED BY
Dr. Amina Hassan 24 Nov 2026, 14:00	Dr. Omar Khalid 25 Nov 2026, 12:00

REVIEW COMMENTS

Assessment reviewed and approved. Follow up on the assigned action at the next quality meeting.

Approval details reflect the recorded independent review in QCare.
